📍 Rahim Yar Khan, Punjab

PROFILE

As a passionate and detail-oriented Full Stack Developer, I specialize in building scalable web applications using Laravel. With strong backend expertise and growing proficiency in React, I bring a balanced blend of server-side logic and dynamic frontend development to every project. I thrive in fast-paced environments, constantly improving through hands-on problem-solving, experimentation, and continuous learning. My goal is to deliver efficient, real-world software solutions that create lasting impact.

EXPERIENCE

Devloop Technologies, Rahim Yar Khan – Punjab

Jan 2025 – Present

At Devloop Technologies, I have contributed to the development of multiple full-stack web applications using **Laravel** and recently integrated **React** into projects for dynamic user interfaces. My focus has been on building scalable, secure, and user-friendly platforms tailored to various industry needs, while maintaining clean code practices and efficient backend architecture.

Key Projects:

➤ **Pure Wear**

Pure Wear is a modern e-commerce platform for fashion and apparel, developed using Laravel for the backend and React with Bootstrap on the frontend. The platform offers seamless user experience with features like dynamic product listings, responsive design, secure checkout, and efficient vendor/product management—delivering both performance and style.

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React, Laravel, MySQL

➤ **Shopex**

Shopex is a sleek and responsive e-commerce frontend built using **React** and **Bootstrap**. Designed for a smooth and intuitive shopping experience, the interface features modern UI components, product listing pages, category filters, and a responsive layout optimized for all devices. This project focuses on frontend performance and user engagement.

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React, MySQL

➤ **Transparagent**

Transparagent is a real estate web platform designed to help agents and assistants collaborate in finding homes for users. I contributed to the **frontend development** using **Bootstrap**, focusing on creating a responsive and user-friendly interface. The platform includes features like advanced analytics and secure Stripe payments (backend handled by collaborators).

Tech Stack: Bootstrap, HTML, CSS, JavaScript | Python, Django (Backend)

➤ **KylinOracle**

KylinOracle is an e-commerce platform focused on Chinese products, providing global accessibility with features like PayPal payment integration and streamlined order management. I developed the **frontend** using **Bootstrap**, ensuring a responsive layout and intuitive user experience. Backend functionality, including payment processing and order logic, was managed by collaborators.

Tech Stack: Bootstrap, HTML, CSS, JavaScript | Python, Django (Backend)

➤ **Byzino**

Byzino is a modern e-commerce platform for beauty and skincare products, featuring a sleek, data-driven interface and secure Stripe payments. I was responsible for crafting the **frontend** using **Bootstrap**, focusing on responsiveness, modern design, and user-friendly navigation. The backend, including payment integration and data handling, was developed by collaborators.

Tech Stack: Bootstrap, HTML, CSS, JavaScript (Frontend) | Python, Django (Backend)

➤ **ShopItNow**

ShopItNow is an e-commerce platform for home essentials and décor, offering a seamless shopping experience with robust data handling and Stripe payment integration. I developed the **frontend** using **Bootstrap**, focusing on intuitive design, responsive layouts, and smooth user interaction. Backend development, including database management and payment integration, was handled by collaborators.

Tech Stack: Bootstrap, HTML, CSS, JavaScript (Frontend) | Python, Django (Backend)

Devicon Software House - Internship, Rahim Yar Khan – Punjab

Sept 2024 – Feb 2025

Completed a 6-month internship focusing on web development. Gained practical experience in building dynamic, user-driven web applications.

Key Projects:

➤ **PKMART**

PKMART is a user-friendly e-commerce platform developed using **Laravel** and **Bootstrap**. It offers essential features like product browsing, cart management, and secure user authentication. With a clean and responsive design, PKMART provides a smooth shopping experience tailored for local and small-scale vendors.

Tech Stack: Laravel, Bootstrap, MySQL

➤ **The Language Academy**

Language Academy is an academic web platform built with **Laravel** and **Bootstrap**, designed to manage language courses, instructors, and student enrollments. The site includes features like course listings, registration forms, secure authentication, and a responsive UI for both students and administrators. It streamlines academic workflows while providing an intuitive learning environment.

Tech Stack: Laravel, Bootstrap, MySQL

EDUCATION

- Bachelor of Computer Science (2021 – 2025)
KFUEIT GPA 3.39
- Matric (2016 – 2018)
Oxbridge School 93.9%
- FSC (Pre-Medical)
Oxbridge College 84 %

SKILLS DEVELOPMENT

- **Nexskill Technologies – Arfa Tower – Lahore**
June 2023 – Aug 2023
Joined Nexskill Technologies for frontend technologies in web.
- **Devicon Software House**
Sept 2023 – April 2024
Joined Devicon Software House for further learning and covered my backend in Laravel.

SKILLS

- Laravel
- React
- Bootstrap
- Tailwind
- Git & Github
- MySQL
- Postman

ADDITIONAL SKILLS

- MS Office
- Time Management
- Communication
- Teamwork
- Problem Solving
